Summary of CV

This section describes briefly a summary of your career in science, academic and research; the main scientific and technological achievements and goals in your line of research in the medium -and long- term. It also includes other important aspects or peculiarities.

José Ramón González Juanatey MD PhD, Professor of Cardiology at the University of Santiago de Compostela (since 2000), Head of Cardiology and Coronary Care Unit of the University Hospital of Santiago de Compostela (since 2007) and past President of the Spanish Society of Cardiology (2013-2015). José Ramón González Juanatey MD PhD is author of more than 740 research articles (38000 times cited / H-index: 59, source WoS), published in the best generalist (NEJM, Lancet, etc.) and cardiovascular journals (Eur. Heart J., JACC, Circulation, Int J Cardiol, Cardiovascular Research, Eur. J. Heart Fail., Revista Esp. Cardiol., etc.).

José Ramón González Juanatey is the coordinator of the Inflammation Area and principal investigator of the Cardiology Group at the Health Research Institute of Santiago de Compostela (IDIS). He was recognized as Spanish Doctor of the Year in 2014, member of the Board of Directors of the Spanish Network on Cardiac Insufficiency (REDINSCOR), former president of the Hypertension Chapter of the Spanish Cardiology Society, governor for Spain of the International Society of Cardiovascular Pharmacology and President of ACC Spanish Chapter.

Dr. González Juanatey is the leader of the cardioCHUS research group of the University Hospital of Santiago de Compostela (CHUS), integrated in the Health Research Institute of Santiago de Compostela (IDIS), the Center for Research in Molecular Medicine and Chronic Diseases of the USC (CIMUS) and also in Center of Biomedical Research in Net for Cardiovascular Diseases (CIBERCV) of the Institute of Health Carlos III (ISCIII) of Spain. The intense work of the group is reflected by the number of research projects obtained in public calls during the last 10 years at regional (6), national (more than 20) and international level (5) projects from the European Commission: 3 of them are clinical: TIMELY, EUCARE and SECURE, another pre-clinical: FABIMED project, and the last is in the manufacturing and clinical interface (ATLANTIC-KET-MED). Financial support has also been achieved from private foundations (Mutua Madrileña, Spanish Society of Cardiology...) and pharmaceutical companies (Novartis, Bayer, Daiichi-Sankyo, AstraZeneca...). More recently, our group was awarded with the first "intramural project" from CIBERCV, an evidence of our capacity of leadership.

The main lines of investigation are: heart failure, with special emphasis on heart failure with preserved systolic function, hypertension, atrial fibrillation, cardiac rehabilitation, hemodynamics, cardiomyocyte endocrinology, epicardial adipose and endothelial tissue biology, and chemotherapy-induced cardiotoxicity. The Cardiology Department of CHUS has been repeatedly chosen for participation in numerous clinical trials (up to 70 different clinical trial per year in the last times).

In recent years, the Cardiology Department has been awarded with the Best in Class (BIC) award (editions of 2013, 2014, 2015, 2017, 2018, 2019 and 2020), Best in Class Excellence award (2020), Innovation in Health award by TelecardioCHUS program and the ReCo program (cardiac rehabilitation in cancer patients).
